# Details on using PDF to Flipping Book 3D for Mac Professional

There are five panels for you to design page flipping 3D book: Home, Settings, Page Layout, Flash Control Settings and Batch Convert.

# I. Home Panel

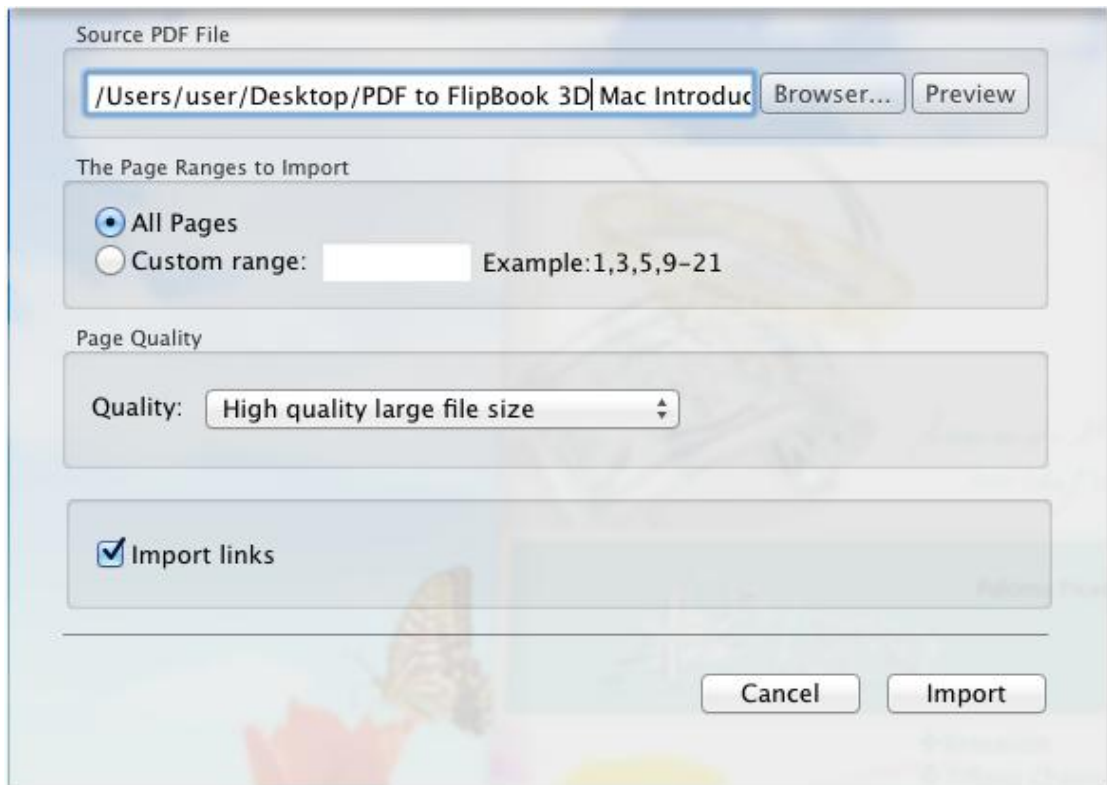

---

## 1. Import PDF

Click "Import PDF" icon to choose PDF file from your computer:

A. You can define page range to import and convert;

B. Set Page Quality and Size to convert your PDF file:

C. Import links.

## 2. Edit Pages

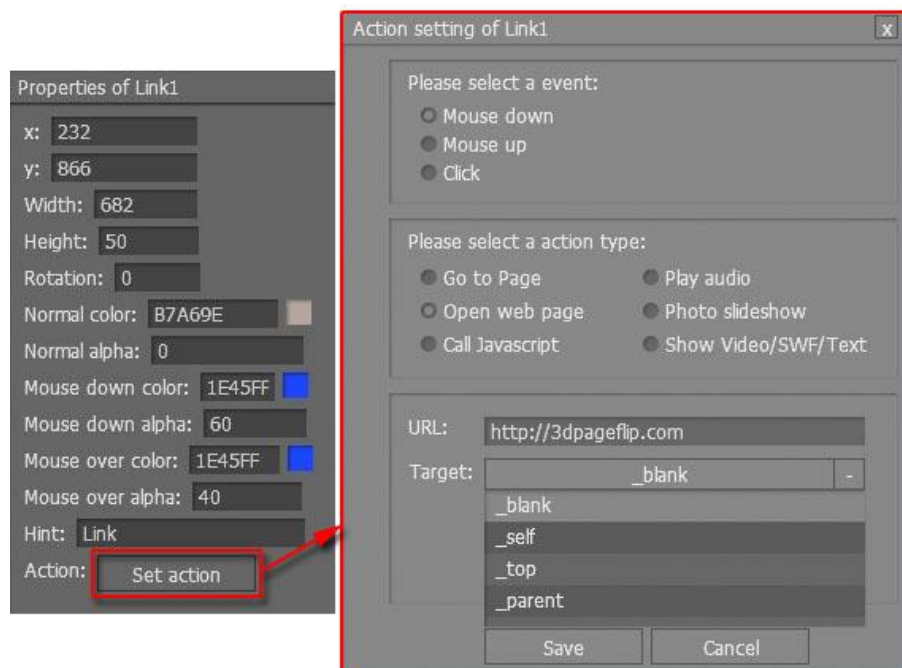

Click "Edit Pages" to add multi-media objects on pages:

### (1). Add Link

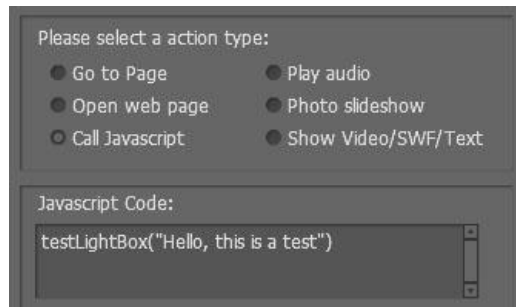

Click the icon  and then draw a link box on the area you want to add link, then define properties in below panel:

You can define the link action as "Go to page", or open an online webpage, or even "Call  
Copyright 2012 by flashflipbook3d.com

Javascript function" to carry out your wanted interactive functionalities via defining Javascript function yourself. For example, you can show a pop-up light box while readers clicking some image on page, or pop-up a questionnaire or other Web Form by clicking some text. Just make sure the parameter you set in "Function" can be called in from HTML page.

**Example:** Check "Call Javascript function" as action type, then input Function as "testLightBox("Hello, this is a test"):

And then make sure the Javascript wrote into the index.html page as below image shows (the same as you set in "Link Function"):

```
<head>
<title>PDF-BenU brochure 2010-100dpi</title>
<meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
<meta name="Keywords" content="" />
<meta name="Description" content="" />
<meta name="Generator" content="[Flip PDF version 3.0] at http://flipbuilder.com/" />
<!-- Include CSS to eliminate any default margins/padding and set the height of the html element and
the body element to 100%, because Firefox, or any Gecko based browser, interprets percentage as
the percentage of the height of its parent container, which has to be set explicitly. Initially,
don't display flashContent div so it won't show if JavaScript disabled.
-->
<style type="text/css" media="screen">
html, body { height:100%; }
body { margin:0; padding:0; overflow:auto; text-align:center;
background-color: #ffffff; }
#flashContent { display:none; }
</style>

<script type="text/javascript">
function testLightBox(strFromFlash){
/**
do the things you want here!
**/
alert(strFromFlash);
}
</script>
```

## (2). Add Movie

Click icon  and draw a box like below on the page you want to insert FLV or MP4 movie:

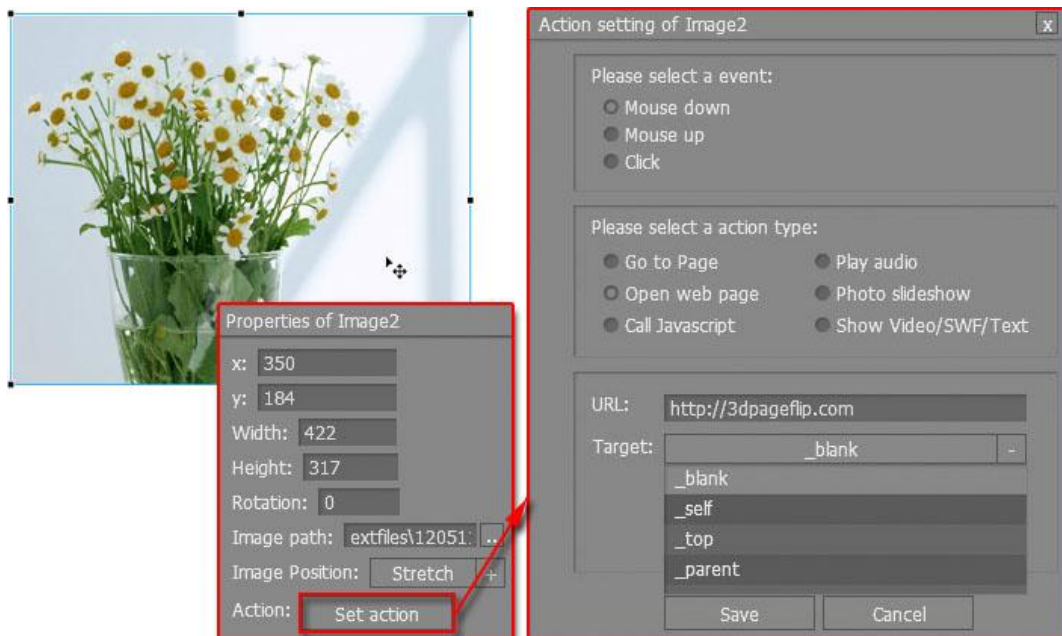

Then you can select and edit the movie in below panel (define video player skin color, play and stop movie actions, etc.):

### (3). Add Image

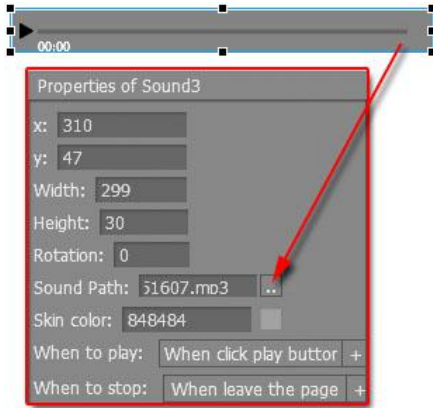

Click the icon  to draw image box and then select image (.jpeg, .jpg, .png, .gif), set Action Options (the same as Link Action Options):

---

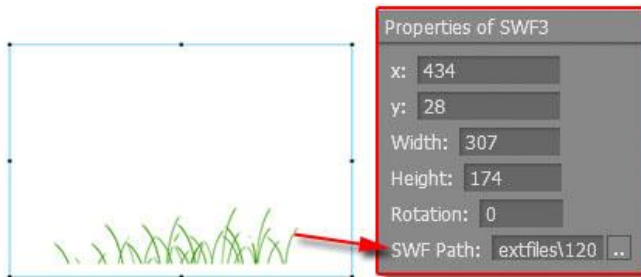

#### (4). Add Sound

Click the icon  to draw sound box and then select sound file, set other options:

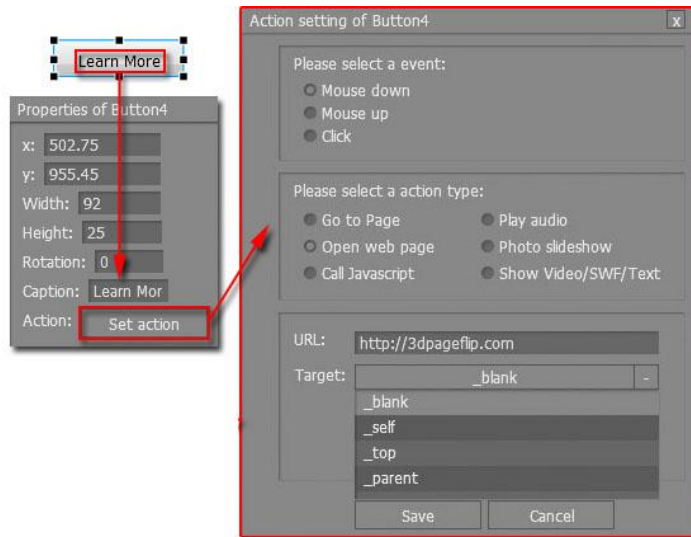

#### (5). Add Flash

Click icon  to insert SWF flash into your defined area of 3D ebook page:

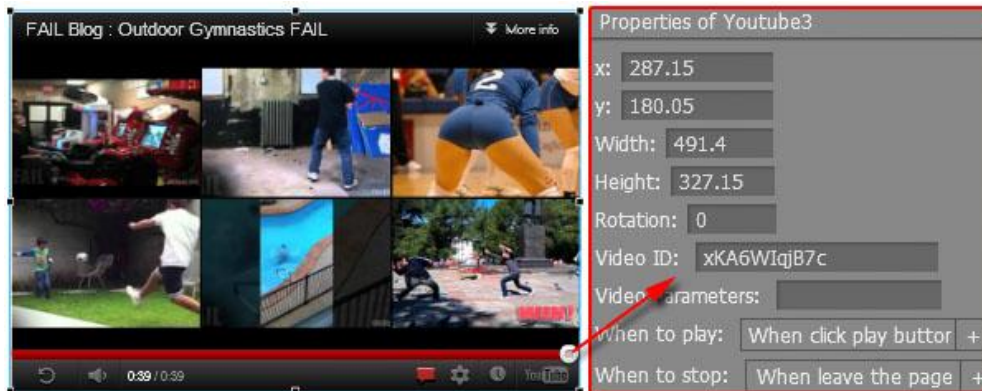

#### (6). Add Button

Click icon  to draw an area for inserting your text button file with add text on button, and calling actions. The actions contain "Go to page", "Open web page", "Call Javascript", "Play audio", "Photo slideshow" and "Show Video/SWF/Text":

### (7). Add You Tube Video

Click the icon  and then draw a box on the page to insert You Tube video into pages directly. You just need to define the video ID directly. For example the video link is: <http://www.youtube.com/watch?v=xKA6WlqjB7c>, then the video ID is "xKA6WlqjB7c".

### Besides, **undo, redo, delete, cut, paste and copy.**

If you want to add same links, images, videos, audios to different pages, you don't have to repeat the "Link/Image/Video/Audio added" operations once and once again, just select the link object, click the "Edit->Copy" ( Ctrl+C ) and then go to the other page to click the "Edit->Paste" ( Ctrl+V ) directly.

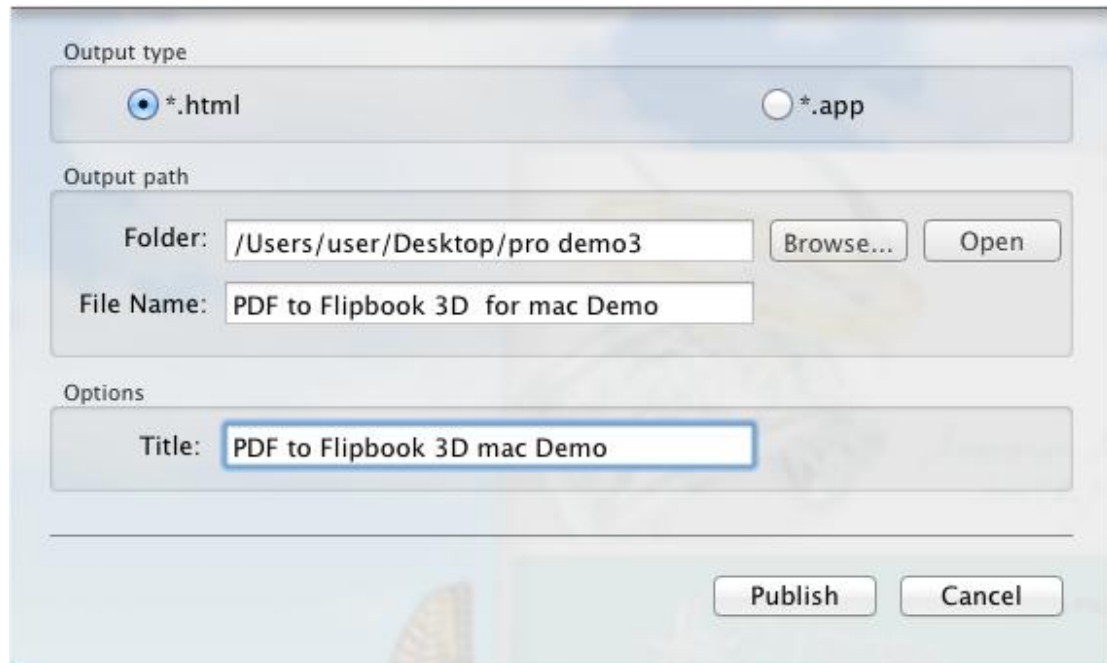

After editing, click icon  to save objects and go to design window.

---

### 3. Publishing Part

Click "Convert-3DBook" to enter into output window as below image shows:

#### (1). HTML

This output type is for uploading created page-flipping ebook onto websites. You can define HTML Title and other properties by clicking "Advanced" button:

Or even "Burn to CD" to save or distribute the book:

#### (2). APP

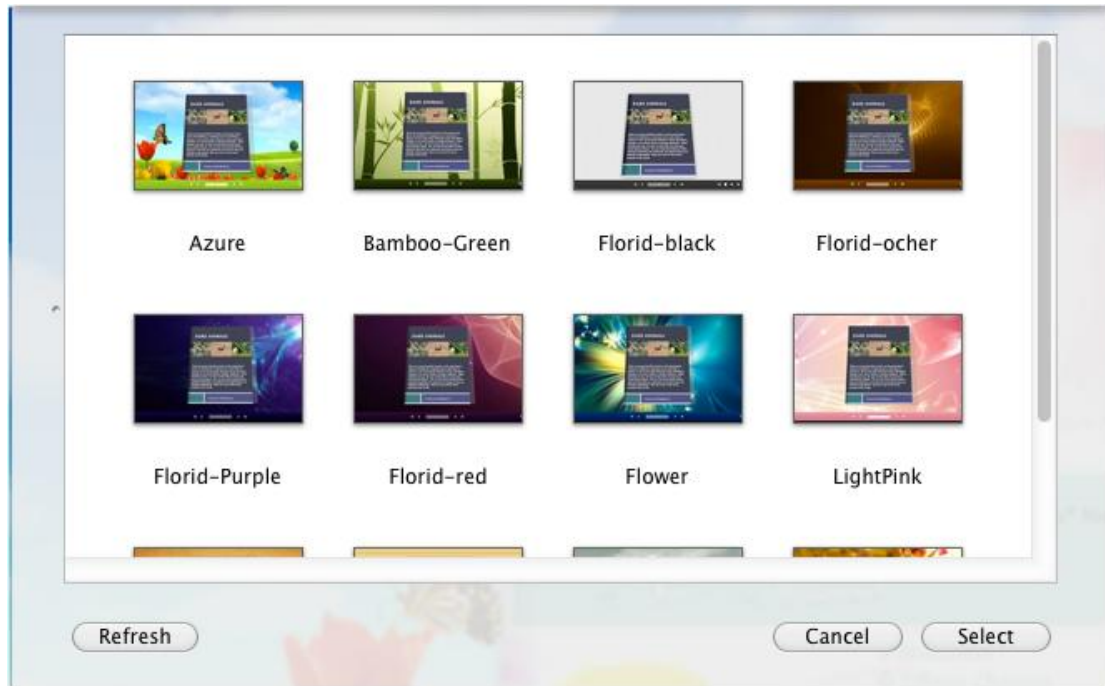

This type is for outputting 3D flipbook as a single executive file, easy storing and easy viewing, you can also define Icon and Opening Window Size in Advanced Settings:

**After you complete all design and page edit work, click "Publish" to output your completed 3D book in selected format.**

---

## 4. Template Part

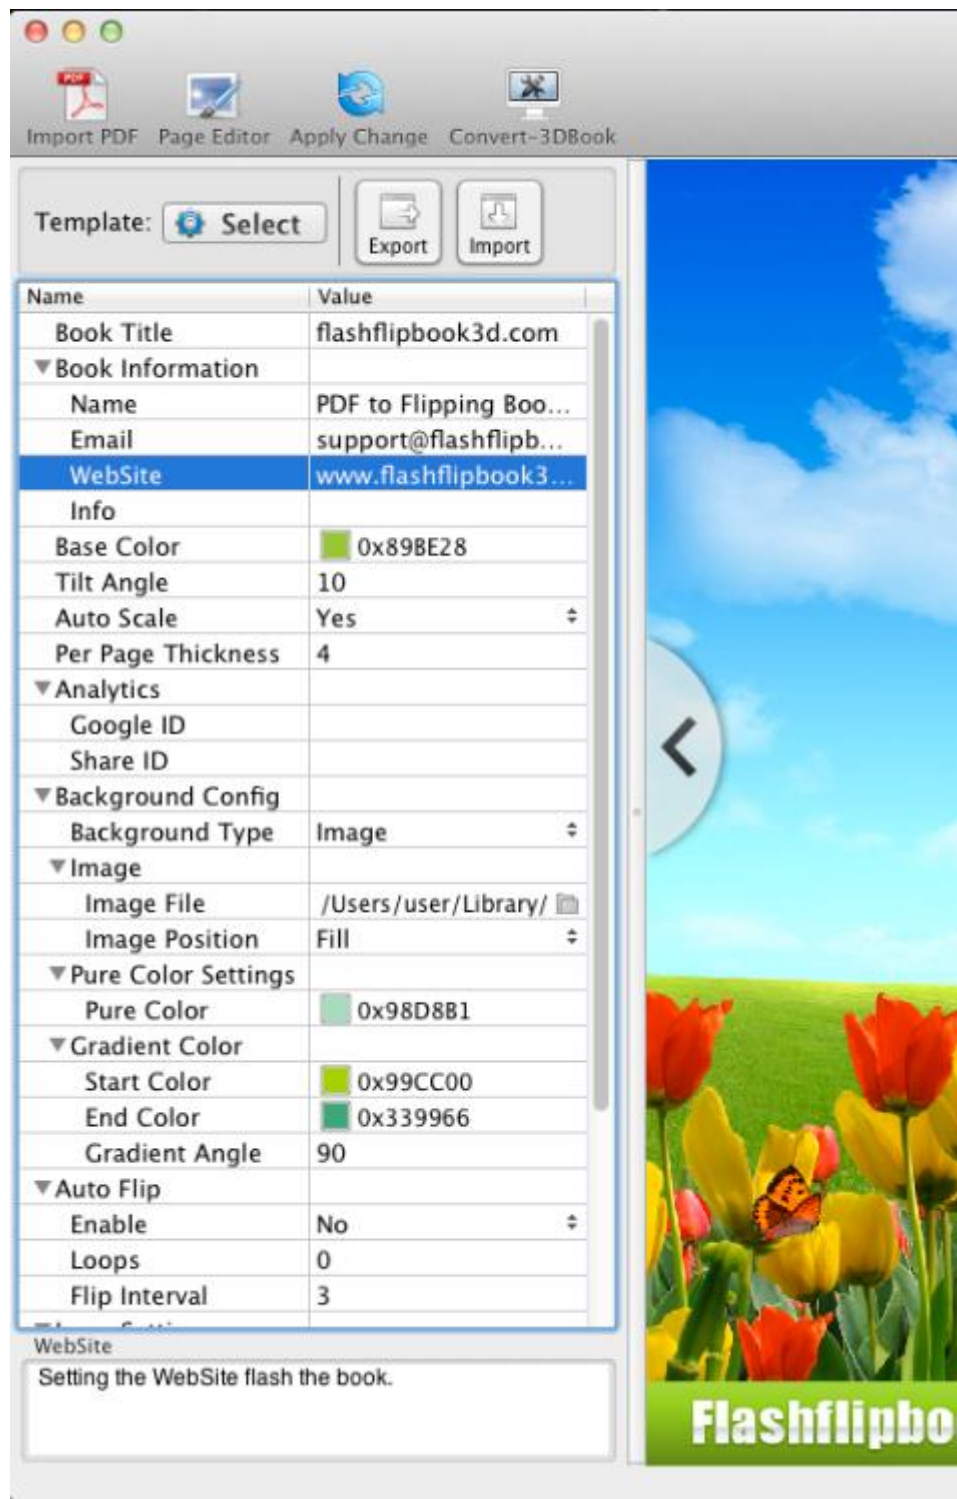

Click "Select Template" icon to select templates from below interface:

After selecting a pre-define template, you can do a lot of settings in Page Layout panel which will be introduced later, and then you can click "Export Theme" to save our settings for later uses by clicking button "Import Theme" directly.

## II. Settings Panel

You can find any settings refer to the right preview window effect. It ranges from tool bar icons hidden or shown to background color. Any tiny detail all considered would enables control the page layout, functions & features of the output flipping 3D flash book.

---

**After settings, you have to Click "Apply Change" icon to apply changes.**
