Import PDF Page

Design Setting Table of Contents

You can setup table content here

Title	Page
<input type="checkbox"/> Cover	1
<input checked="" type="checkbox"/> Catalogue	2

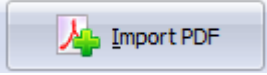

Title:

Page:

1. Project Part

In this part, you can "Import PDF", "Save Project", "Open Project":

(1). Import PDF

Click "Import PDF" icon  to choose PDF file from your computer:

A. You can define page range to import and convert;

B. Click "Application" button  to choose render engine for importing your PDF file. There are 3 different kinds of render engine for choose to avoid distortion for some special PDF files (Change option when PDF imported failed):

SWF: Much legible characters, smaller output size

GPL Ghostscript: Higher color transfer quality

Inner Library: Faster convert speed

C. Set Page Quality and Size to convert your PDF file:

D. Import links and text content from your PDF file to click or search in 3D book later.

(2). Project

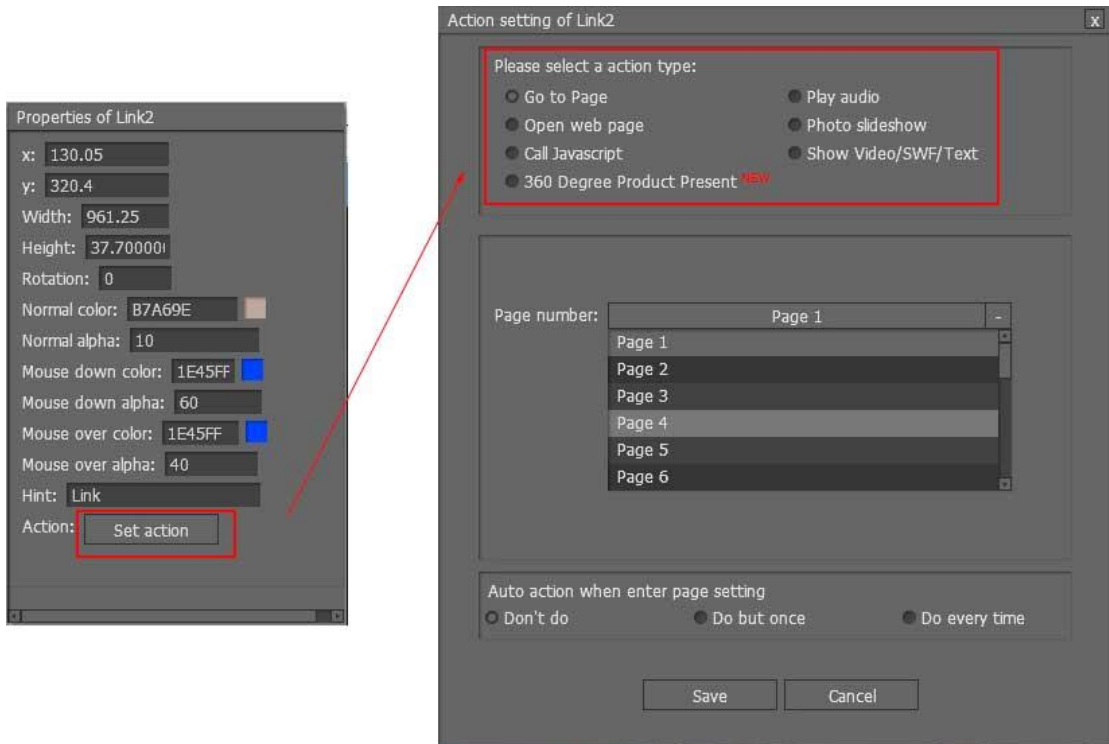

Click "Save Project" to save the imported files and current settings as a project file, and when you want to modify or complete the project, just click "Open Project" to edit the stored project directly.

2. Page Editor

Click "Edit Pages"  to add multi-media objects on pages:

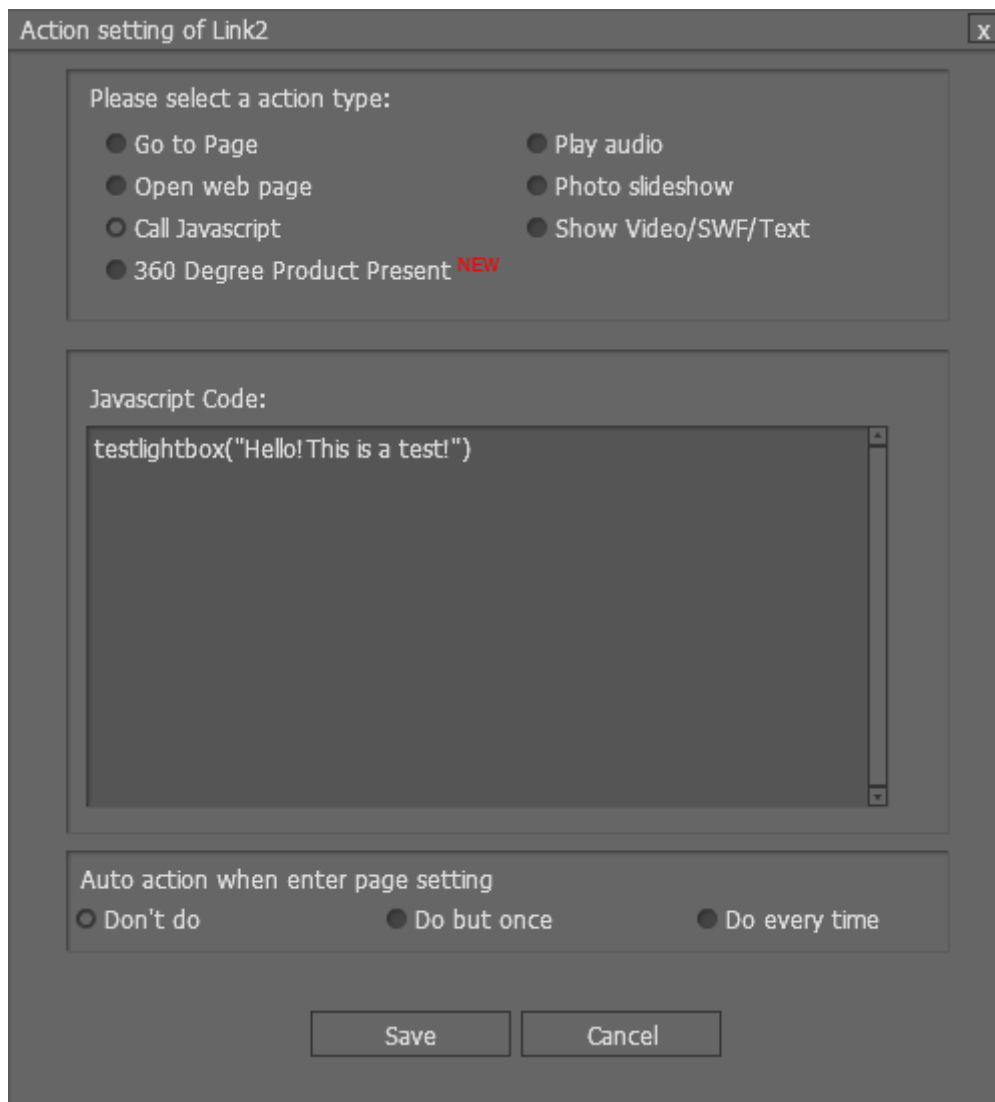

(1). Add Link

Click the icon  and then draw a link box on the area you want to add link, then define properties in below panel:

You can define the link action as "Go to page", or open an online webpage, or even "Call Javascript function" to carry out your wanted interactive functionalities via defining Javascript function yourself. For example, you can show a pop-up light box while readers clicking some image on page, or pop-up a questionnaire or other Web Form by clicking some text. Just make sure the parameter you set in "Function" can be called in from HTML page.

Example: Check "Call Javascript function" as action type, then input Function as "testLightBox("Hello, this is a test"):

And then make sure the Javascript wrote into the index.html page as below image shows (the same as you set in "Link Function"):

```

<head>
<title>PDF-BenU brochure 2010-100dpi</title>
<meta http-equiv="Content-Type" content="text/html; charset=utf-8" />
<meta name="Keywords" content="" />
<meta name="Description" content="" />
<meta name="Generator" content="[Flip PDF version 3.0] at http://flipbuilder.com/" />
<!-- Include CSS to eliminate any default margins/padding and set the height of the html element and
the body element to 100%, because Firefox, or any Gecko based browser, interprets percentage as
the percentage of the height of its parent container, which has to be set explicitly. Initially,
don't display flashContent div so it won't show if JavaScript disabled.
-->
<style type="text/css" media="screen">
html, body { height:100%; }
body { margin:0; padding:0; overflow:auto; text-align:center;
background-color: #ffffff; }
#flashContent { display:none; }
</style>

<script type="text/javascript">
function testLightBox(strFromFlash){
/**
do the things you want here!
**/
alert(strFromFlash);
}
</script>

```

Still we take **360 Degree Product Presentation** for example:

There is a FAQ online introduce how valid it and make sense:

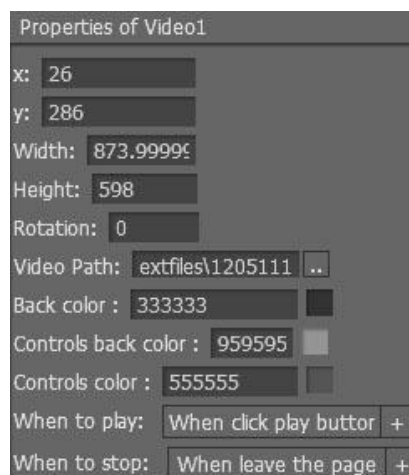

<http://www.flashflipbook3d.com/faq/can-i-hitch-a-360-degree-product-presentation-in-true-3D.html>

(2). Add Movie

Click icon  and draw a box like below on the page you want to insert FLV or MP4 movie:

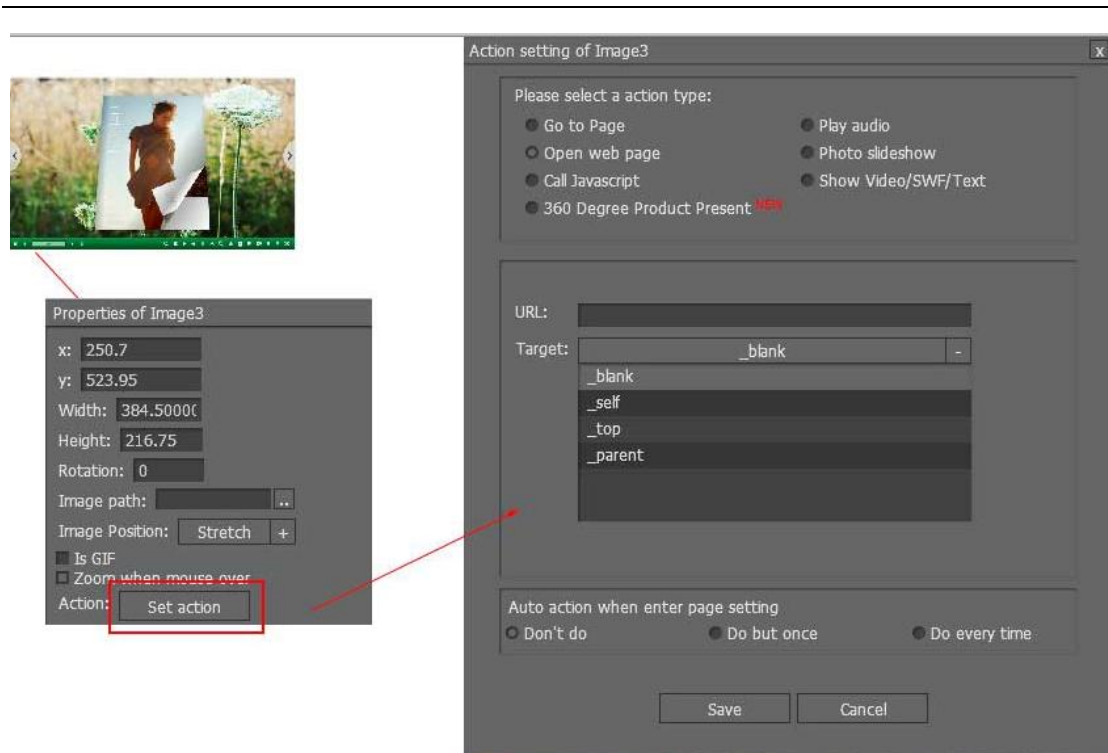

Then you can select and edit the movie in below panel (define video player skin color, play and stop movie actions, etc.):

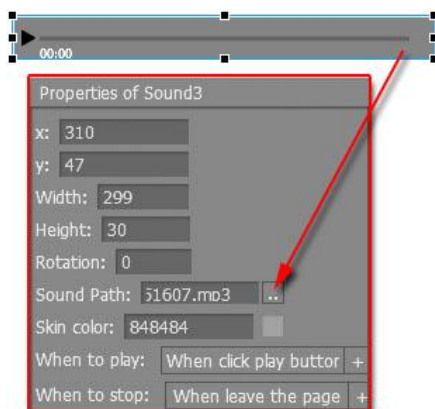

(3). Add Image

Click the icon  to draw image box and then select image (.jpeg, .jpg, .png, .gif), set Action Options (the same as Link Action Options):

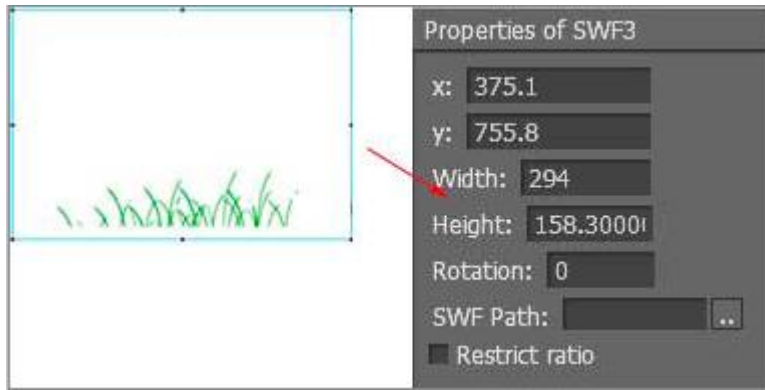

(4). Add Sound

Click the icon  to draw sound box and then select sound file, set other options:

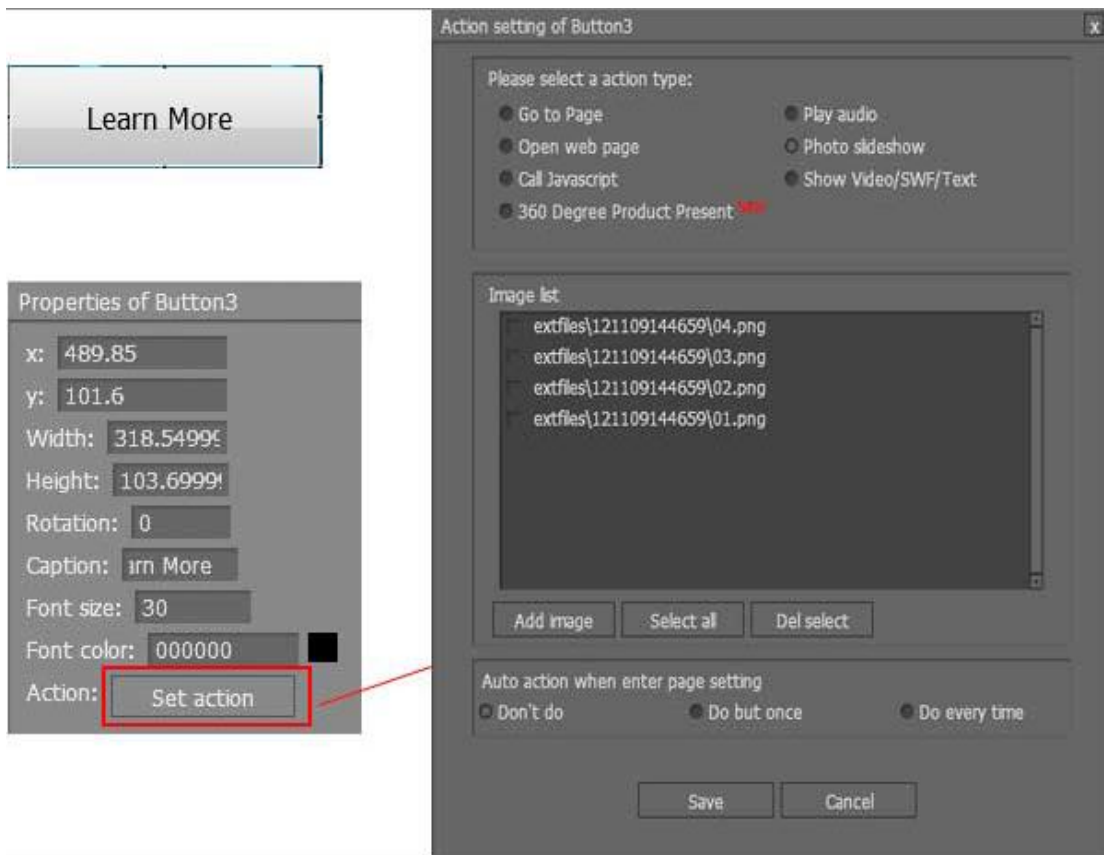

(5). Add Flash

Click icon  to insert SWF flash into your defined area of 3D ebook page:

(6). Add Button

Click icon  to draw an area for inserting your text button file with add text on button, and calling actions. The actions contain "Go to page", "Open web page", "Call Javascript", "Play audio", "Photo slideshow" and "Show Video/SWF/Text":

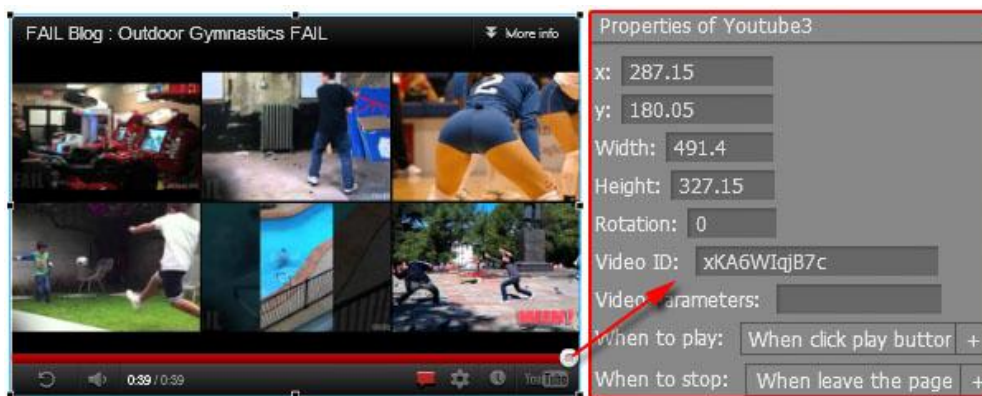

(7). Add Bitmap

You can click on . Import image (transparent or not) or SWF file and set actions for. It supports reactions for your mouse move or hover on.

(8). Add You Tube Video

Click the icon  and then draw a box on the page to insert You Tube video into pages directly. You just need to define the video ID directly. For example the video link is: <http://www.youtube.com/watch?v=xKA6WlqjB7c>, then the video ID is " xKA6WlqjB7c".

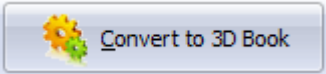

Besides, undo, redo, delete, cut, paste and copy.

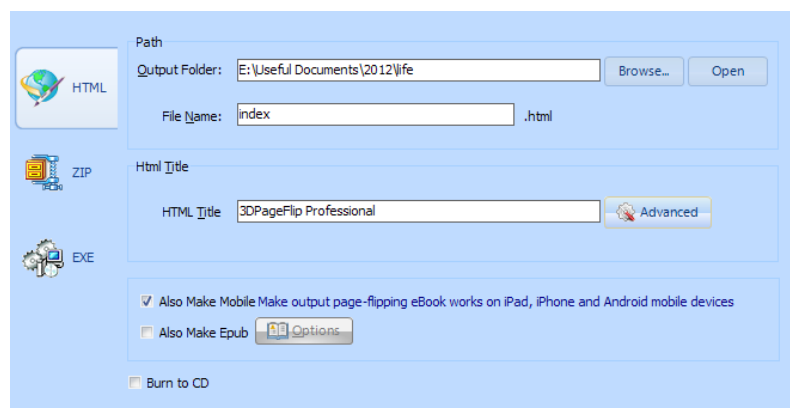

If you want to add same links, images, videos, audios to different pages, you don't have to repeat the "Link/Image/Video/Audio added" operations once and once again, just select the

link object, click the "Edit->Copy" (Ctrl+C) and then go to the other page to click the "Edit->Paste" (Ctrl+V) directly.

After editing, click icon  to save objects and go to design window.

3. Publishing Part

Click "Publish"  to enter into output window as below image shows:

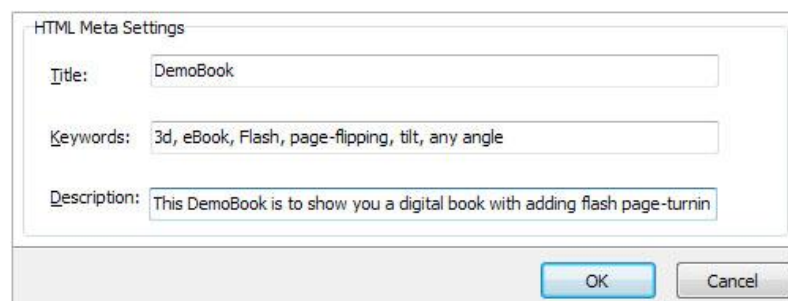

(1). HTML

This output type is for uploading created page-flipping ebook onto websites. You can define HTML Title and other properties by clicking "Advanced" button:

Set Keywords and Description in the below interface:

You can also check option "Also Make Mobile", after uploading all files online (including HTML, SWF, "files" and "mobile" folders), then you can visit the flipbook page through browser on iPad, iPhone and Android devices.

Or check "Also Make Epub" option to output Epub format book with HTML type together (EPUB became an official Professional of the International Digital Publishing Forum in September 2007, comparison of e-book readers contain: Android devices iPad, iPhone, and iPod Touch, Sony Reader).

Or even "Burn to CD" to save or distribute the book:

(2). ZIP

This output type is for compressing the created files into an integral ZIP package which can be sending out as attachment directly. You can also define HTML Advanced Settings by clicking "Advanced" icon. Your recipients just need to uncompress the ZIP file and then they can view the HTML DemoBook instantly. You can also build Mobile version, Epub format book or burn to CD as you want.

(3). EXE

This type is for outputting 3D flipbook as a single executive file, easy storing and easy viewing, you can also define Icon and Opening Window Size in Advanced Settings:

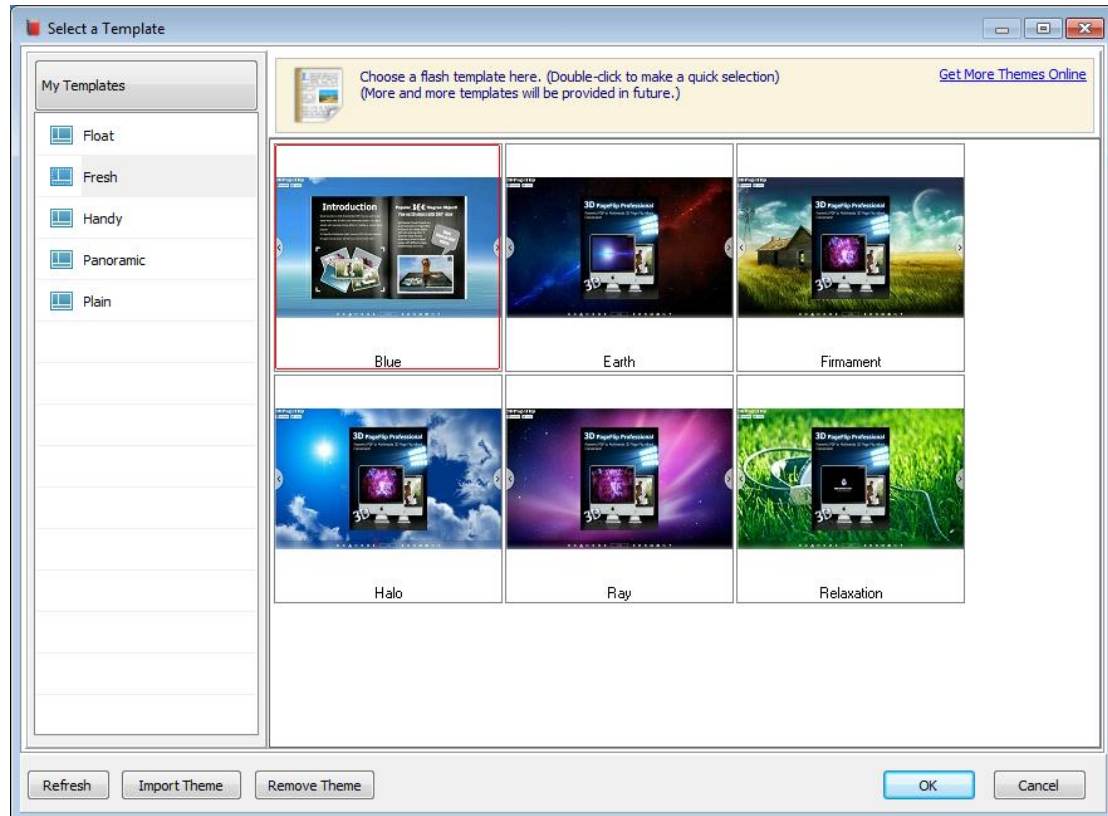

You can also burn the EXE eBook to CD.

After you complete all design and page edit work, click "Convert" to output your completed 3D book in selected format.

4. Template Part

Click "Select Template" icon to select templates from below interface:

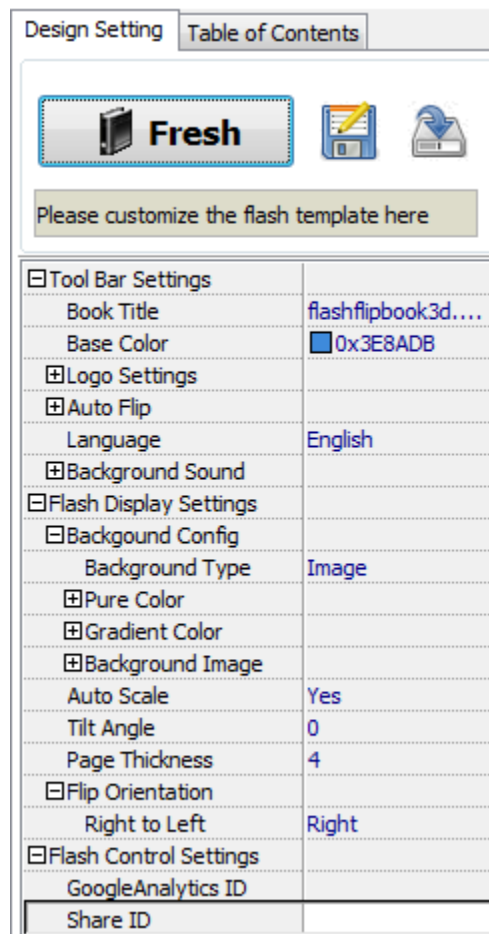

After selecting a pre-define template, you can do a lot of settings in Page Layout panel which will be introduced later, and then you can click "Export Theme" to save our settings for later uses by clicking button "Import Theme" directly. Download more free themes to use: flashflipbook3d.com/themes-2012.html .

5. Design Setting Part

Click "About" to know the program version information and your register information, click "Help" to read manual of the program.

II. Settings Panel

1. Auto Flip

<input type="checkbox"/> Auto Flip	
Enable	No
Loops	0
Flip Interval	3

To auto flip your eBooks, you can set "Auto Flip->On", then define loops and Flip Interval (seconds of staying on each page). After clicking the Auto Flip button, the flipbooks will be flipped by staying 3 seconds per page.

2. Sound

<input type="checkbox"/> Background Sound	
Sound File	
Loops	Yes
Play Flip Sound	No

If you want to add background sound to your flipbook, such as a song or other audio file, click

"Sound->Load a Sound" to choose audio from your computer, then set "Loops->on". The "Play Flip Sound" option is to help you define whether play page flipping sound or not when flip pages.

3. Scale and Page Thickness

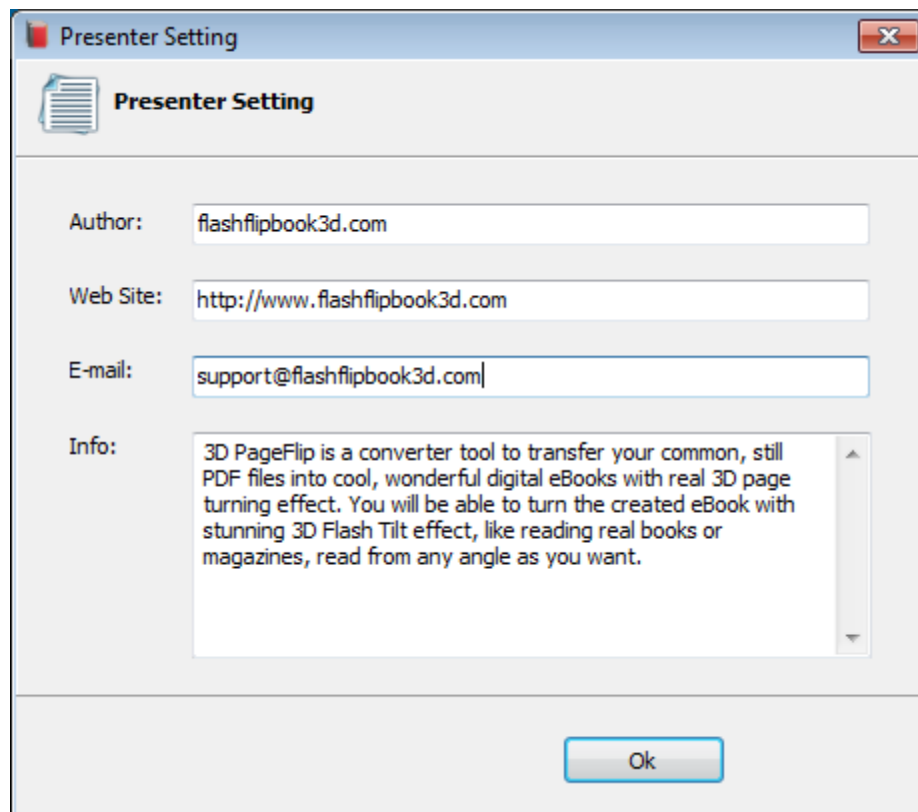

[-] Background Config	
Auto Scale	Yes
Tilt Angle	25
Page Thickness	4

You can show your book in original page size with un-checking the option "Auto Scale", or let the book show properly in different Flash Container with checking this option. The program helps to build page-flipping eBooks with real life-like book effect, you can set thickness per page.

4. Book Info

Click "Book Info" button you will be able to define information about your eBook such as Author, Web Site and E-mail which will be shown in "About" window:

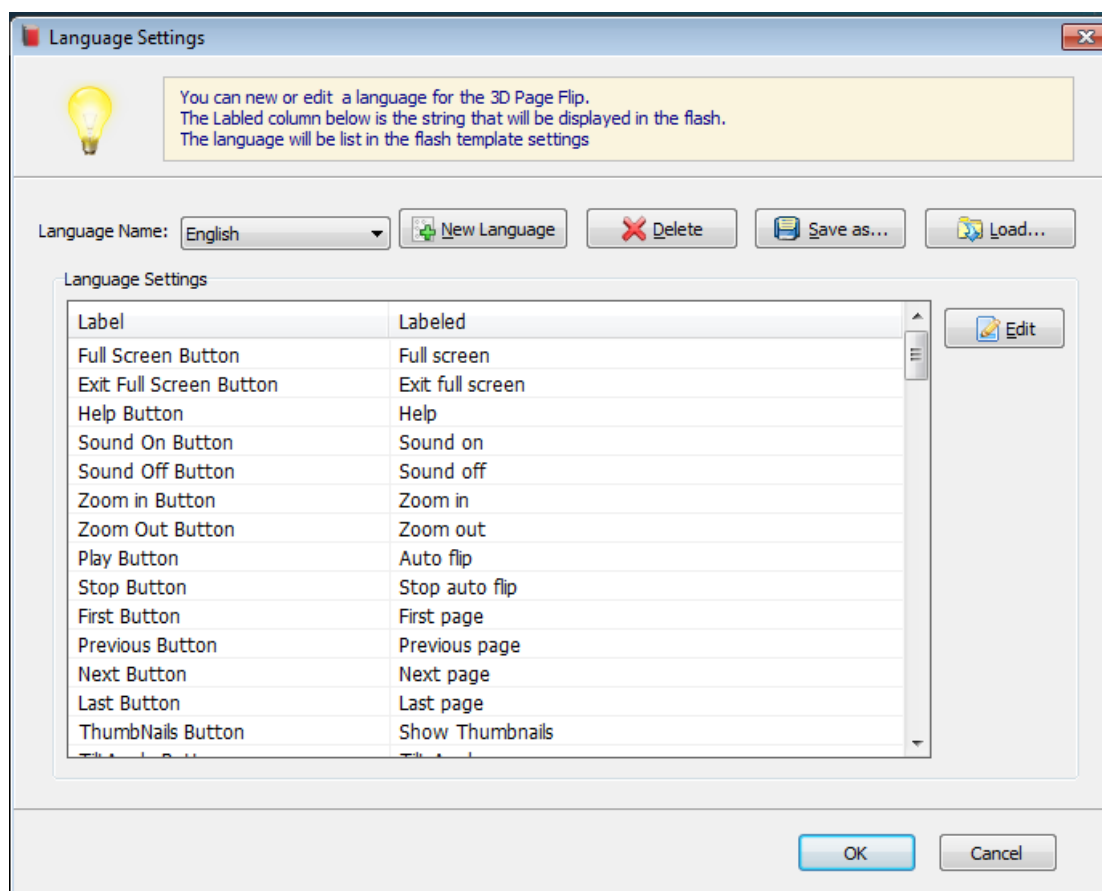

Click "About" button  the below window will pop up instantly:

5. Language

If you want to use another display language for your 3D flipbook, you can click "Flash Language" to enter into the Language Settings interface as below shows:

As the tips explaining, the "Labeled" column lists the buttons and instructions on Flash books in defined language, and the program provides you two different languages for you to use: English and Chinese. You can also add other language for your own uses:

1. Click the button  and define name for the new language:

Click "OK" to save the new language in the list;

2. Choose the first label and click "Edit" button , define new language text in "Labeled" box, then click "Save And Edit Next" (Alt+S):

3. At last, you can get all Labels translated into your new language.

You can delete unwanted language:

Or save your edited new language file as XML or TXT file:

Load language file saving before for current using:
